

Quick Start Guide To:

Linking Text to the Internet

Linking Text

- Click on Content Editor in the Swiftpage Online Editor
- Click on Text Options
- Click on the window that you want to add hyperlinked text to and then click the Edit Text button
- Type whatever content you wish into the box and be sure that the words you want hyperlinked are included
- Now highlight the words you want linked with your mouse and then click the globe and chain-link icon in the toolbar
- Type the web address in the URL field, click OK and you are done and your words are now linked to that webpage
